

Baseball/Softball field jobs:

This is a new install, Category 1 and Category 2 equipment; the fiber is lit, as I have been told that it runs in the area. Below is a map of the ballfield. Each building will have a fiber run to it. The equipment for each build is 1 each 16 Port POE Unifi Pro switch, and one each UNIFI Pro AP WIFI, 1 each UPS, and cable to make all connections.

Here is the McLish Site job. All these Jobs are Category 2: The New McLish Annex Classroom building marked on the map will be bidding out 1 UPS, and 5 AP Pro WIFI access points, and all needed cabling.

The ballfield house will be running fiber or even copper to it. That will need 1 UPS, 1 UNIFI AP Pro Access point, and one 8 Port POE UNIFI Switch.
