

## **Berryhill YEAR 22 E-Rate Category 2 Project Bidding Details**

### **Access Points Upgrade:**

- ☐ Purchase 65 access points
- ☐ 32 APs to replace old APs with cloud based APs across the district. (most of these will be at the Middle School and High School sites)
- ☐ Add 33 new additional APs in the following sites in order to be 1AP per classroom across the district.
  - South Elementary would need - 10 Additional
  - North Elementary would need - 5 Additional
  - High School and Middle School Campus - 18 Additional

**\*\*NOTE:** To meet our project goal of having one AP per classroom for all buildings we would need 33 new additional access points (including new cabling runs) as well as 32 current access points replaced with new cloud based ones (no cabling needed for these, use current runs). Compatible with current Alcatel APs.

### **Battery Backup Upgrades:**

We need to replace our old battery backups on two of our main instructional site switches in the secondary server room. Capmatible with current CyberPower backups.

### **Sophos Firewall and Filtering MIBS:**

We need 12 months of Sophos XG Firewall service.
